

Screen Up® Cover Strip

Screen Up / Screen Up® Extender

- Use as cover strip for a neat finish
- Use as brace strip for screens wider than 1200mm
- Long-life powder-coated aluminium

DUAL USE STRIP

Whites Screen Up Extender Cover Strip has two uses:

- as a cover strip on extender posts when the channel is not used for screening, simply slide-in the strip for a neat finish at the end of a run of screening
- as a bracing strip for screens wider than 1200mm to prevent timber from warping and keep the screen looking good for years to come

Handy Hint:

- We recommend the use of 15mm button head screws for attaching brace strip to timber slats.
