

Screen Up® Ground Plates

Screen Up / Screen Up® Freestanding

- Anchor plate for setting into concrete
- Base Plate for fixing to solid surfaces
- For use with Screen Up Freestanding Posts

SECURELY ANCHORS FREESTANDING POSTS

Whites Screen Up Ground Plates are available in two types, providing secure mounting options for the Freestanding system:

- The Base Plate is fixed through four bolt-holes and can be mounted onto concrete and timber decks or patios etc.
- The Anchor Plate features a concrete-set leg below the flange for setting into concrete when pouring footings.

In both cases, the end result is a solid foundation for Screen Up Freestanding Posts which are then screw-fixed in place.
