

Pea & Bean Frames

Vegie Growing / Vegie Frames & Panels

- Easy to use and DIY friendly
- Sturdy support trellis
- Large growing capacity frame OR small space ladder model
- Complete kit

EASY DIY A-FRAME TRELLIS

Whites **Pea & Bean Frame** features a complete 1.8m wide trellis frame, which includes:

- 7 x 1.8m garden stakes
- 3 x 3-way connectors
- 1 x trellis netting

It provides a sturdy support for peas, beans, cucumbers and other climbers and a large growing capacity of 1.8m x 1.8m on both sides of the frame.

Building the Frame

1. Insert stake ends into connectors to build three sets of legs.
2. Position legs and dip into place along top rail.

Attaching Netting

1. Place trellis netting over the top rail and pull taut.
2. Secure netting at the base and sides.

Note:

- Trellis netting is not designed to be used as bird netting.

Whites **Pea & Bean Ladder Kit** is an easy to assemble frame, ideal for most climbing flowers, plants and vegetables. Simply screw the stakes together and click the clips to connect the rungs on the ladder. Then push it into the ground to start planting.

- Stands 2m high.

Safety tip:

Product Data Sheet

- Do not use as a climbing apparatus.
