GARDEN USE & CRAFT PROJECTS

Whites Coco Fibre Rope is a strong, biodegradable, natural fibre, suitable for all garden use. Ideal for fixing young trees or tying plants to support poles. Perfect for craft projects, and for macramé to hang baskets or potted plants. Recyclable and environmentally friendly.

Did you know?

Coir or coconut fibre is a natural fibre extracted from the outer husk or coconut and used in products such as floor mats, doormats, brushes and mattresses. Coir is the fibrous material found between the hard, internal shell and outer coat of a coconut. White coir, harvested from unripe coconuts is used for making finer brushes, string, rope and fishing nets. It has the advantage of not sinking.
