

Concreter's Posts

Concreting / Concreting Accessories

- Use to secure formwork
- Pre-drilled holes for convenience
- Tapered point for easy driving
- Can be used for various home & garden work
- Available in two heights

Whites Concreter's Posts are steel posts used to secure formwork when concreting. The pre-drilled holes allow you to conveniently nail or screw the posts into place, whilst the tapered point drives easily into the ground. These posts can be used for various home and garden work and can be re-used over and over again.

Available in 400mm and 800mm heights.

PRODUCT SPECIFICATIONS

Code	Product Name	Height (mm)
