

Fire Guard Gutter Guard

Gutter Protection / Gutter Mesh Rolls

- Conforms to Australian standards for use in bushfire prone areas
- Robust galvanised steel mesh retains its shape
- Keeps out small leaves and debris allowing good water flow
- Easy DIY installation

RECOMMENDED FOR FIRE ZONES

Whites Fire Guard Gutter Guard conforms to Australian Standards for use in bushfire-prone areas. Tested and certified by CSIRO to AS1530.2 with a flammability index of 1, Fire Guard Gutter Guard is especially recommended for fire zone areas. Available in standard 190mm width and 300mm width for wide valleys and gutters.

Handy Hints

- For protection against ember attack, we recommend Whites Ember Mesh Stainless Steel Guard
- Beware of recoil and sharp edges
- Always wear eye protection and gloves to avoid cuts and abrasions
