Flexible to fit different garden angles and curves, simply tap into place and lock together using the interlocking tab. Click on the last image on the photo gallery above for full instructions.

Available in two heights: 130mm and 200mm.

About Oxy-Shield

Oxy-Shield is a specially formulated landscaping steel designed to impart a decorative rust-look without the inherent degradation of regular steel. The surface oxidises to form a protective coating resistant to corrosion and flaking - a durable long-lasting steel.

Rustic tones will further develop and enhance over time, to accelerate the effect, spray regularly with a fine mist of water. With a rich, earthy patina - a favourite amongst landscapers, the decorative finish blends effortlessly into any backyard or courtyard setting and with traditional and modern gardens.

Safety Tip:

- Always wear protective gloves and glasses during installation.
