- Perfect for curved path and garden borders
- Unique built-in interlocking system
- Decorative garden feature
- Oxy-Shield Landscapers Steel
- Develops a rich, earthy patina
- Resists corrosion - durable long-lasting steel
- Available at selected Bunnings stores only. Please check with your local store.

FLEXIBLE AND DECORATIVE GARDEN FEATURE

Whites Oxy-Shield Flexible Interlocking Edging Strip is ideal for curved paths and garden borders. Simply lay your edging strips in place and lock using the interlocking tabs to form a continuous length. Then, secure your edging strips with stakes to form your curve. Use Whites 7mm tent pegs for staking. Click on the last image on the photo gallery above for full instructions.

About Oxy-shield

Oxy-Shield is a specially formulated landscaping steel designed to impart a decorative rust-look without the inherent degradation of regular steel. The surface oxidises to form a protective coating resistant to corrosion and flaking - a durable long-lasting steel.

Rustic tones will further develop and enhance over time, to accelerate the effect, spray regularly with a fine mist of water. With a rich, earthy patina - a favourite amongst landscapers, the decorative finish blends effortlessly into any backyard or courtyard setting and with traditional and modern gardens.

Safety Tip:

- Always wear protective gloves and glasses during installation.

PRODUCT SPECIFICATIONS

Code	Product Name	Height (mm)	Length (mm)	Finish
