

Dripper System

Planter Pots / Garden Up® Irrigation Kits

- Water 20 plants with one turn of the tap
- Add a timer for automatic watering
- 23m of vinyl tubing suits most gardens
- Quick and easy installation
- Available at Bunnings New Zealand only. Please check with your local NZ store.

WATER AND TIME-SAVING SOLUTION

Whites Dripper System Irrigation Kit is a simple solution that saves you time as you can water 20 plants at one time and saves water as it promotes slow even-watering. You can even add a timer for automatic watering to allow you to multi-task.

It's an ideal watering system for vertical gardens, hanging baskets, vegie patches and raised garden beds.

With simple push-fit installation and a tap adaptor that fits standard 3/4" outside taps, it's a quick and easy set up.

Pack includes 10 x In-line Drippers, 10 x End Drippers, 23m Tubing, connectors, stakes and clips: enough to run up to 15m of main tubing plus branches.

Handy Hints:

- Create a branch network as opposed to one long system to avoid water pressure issues.
- For detailed instructions, click on the images in the photo gallery above.

PRODUCT SPECIFICATIONS

Code	Product Name	Length (m)	Suits
18059	Irrigation Dripper Kit	23	20 plants
