### ORGANIC AND CHEMICAL-FREE GARDENING

The **All-Weather** protective plant cover filters direct sunlight, extends your growing season and keeps out pests.

It allows you to grow plants earlier in the season and provide pesticide-free protection.

Dual protection shade mesh with clear sides: Top section filters the sun protecting from harmful rays while allowing water and air to penetrate. Lower section clear PVC sides keep plants and soil warmer in colder months, keeping in moisture.

The **Sun and Insect** protective plant cover filters the sun protecting plants from harmful rays.

The mesh sides keep out pests and allow water and air to penetrate. Allows easy access for monitoring and maintaining plants.

Dual protection mesh blocks out insects & pests: Top section filters direct sunlight while allowing water and air to penetrate. Lower section allows natural ventilation and visibility.

The **Greenhouse** protective plant cover extends your growing season.

Clear PVC sides keep plants and soil warmer in colder months, maintains moisture during the growing period. Handy side vents allows easy access for maintaining plants.

The **Pest Protect** protective plant cover keeps out pests yet allows the natural environment, such as sunlight and rain, to penetrate.

It allows you to easily view, monitor and water your plants while protecting them from pests.

All plant covers are quick to setup and store flat for re-use.

The kits include:

- 4 ground stakes
- 1 mesh cover
- 2 dome cover poles
