

Chicken Netting

Mesh & Netting / Pen & Enclosure Netting

- Versatile netting for chicken enclosures & garden use
- Standard 50mm (2") hex aperture
- Wire diameter is 1.00mm for light duty applications
- Also available in 1.4 and 1.6mm for HD applications
- Easy to shape & mould

50MM (2") HEX APERTURE

Whites Chicken Netting is a strong and flexible netting with a wire diameter of 1.00mm and a standard hexagon aperture of 50mm. It is an all-purpose netting ideal for poultry yards, chicken coops, plant protection and garden trellising.

It is made from galvanised steel wire for strength and additional protection from the weather.

It comes standard in 50m packs and is also available in convenient 5m and 10m packs for smaller jobs.

Note: It is recommended that new galvanised wire mesh used in aviaries and pet cages be treated to remove excess zinc that could possibly harm the pets. Shave off any zinc spikes with a utility knife. The mesh should then be scrubbed with a mild solution of vinegar (2 cups in a bucket of water), and rinsed with clean water.

Handy Hint:

- Be sure to take into account the wire diameter, aperture and roll size when selecting mesh for a project.
- To view our entire range of mesh and netting click on the 'shadow board' image in the photo gallery at the top of this page
