

Trellis & Tomato Mesh

Mesh & Netting / Garden & Trellis Mesh and Netting

- For trellising and light climbing plants
- Ideal for climbing flowers and vegetables
- Easy to mould in shape
- Available in galvanised and decorative green PE coated finishes

LARGE APERTURE MESH FOR CLIMBERS

Whites Trellis Mesh is ideal for growing climbing flowers and vegetables, trellising and for plant protection.

It is available in convenient 5m and 10m packs.

Handy Hint:

Allows tomato bushes to grow naturally

Whites Tomato Mesh allows tomato bushes to grow naturally. The large 150mm square aperture provides easy access to fruit, prevents rotting and there is no need for tying.

Manufactured from galvanised wire, it can also be used as a Trellis for climbing plants.

Handy Hint:

- Tomato frames are self-supporting. Simply form a ring around the plant and grow your tomato plant through the ring's centre. As a guide, a 10m roll of Tomato Mesh will make 7-8 tomato frames.
- To view our entire range of mesh and netting click on the 'shadow board' image in the photo gallery at the top of this page
