

Galvanised Steel Edging

Garden Edging / Edging Strips

- Made from high-strength galvanised steel
- Fits different garden angles & curves
- Unique in-built interlocking system

FOR CONTEMPORARY STYLE

Whites Interlocking Steel Edging Strip is a decorative, modular panel ideal for flower beds along paths, driveways and in backyards.

The modern steel finish adds contemporary style to any garden.

Easy to install, the unique in-built interlocking system means you can add extra panels in straight runs, angles and even curves.

COMPLETES THE CONTEMPORARY LOOK

Whites Interlocking Steel Edging Corner offers a decorative and modular 90-degree corner that complements the Interlocking Steel Edging Strip to build an interlocking system for your flower beds on paths, driveways or backyards.

The modern steel finish adds contemporary style to any garden.

Easy to install:

- Simply connect the edging corner by inserting it onto the previous strip from above
- Then lock the strip and corner together with the two tabs
- Using a screwdriver, bend the first tab on itself to lock the second tab in place

ADD CONTEMPORARY STYLE TO TREES OR SHRUBS

Whites Interlocking Steel Tree Ring is a decorative edging for trees and shrubs in lawns and gardens.

The modern steel finish adds contemporary style to any garden, while the high-strength steel protects against line trimmers.

Easy to install, the unique in-built interlocking system gives a neat, flush finish.

Handy Hints:

- Always wear protective gloves and glasses during installation
- Follow the installation instructions on the pack (also in the photo gallery above)
